EXECUTIVE SUMMARY

D2C Fashion Brand Retention Analysis (SQL-Driven)

Customers
3,900

Promo Dependent
43.0%

Loyal Customers
42.6%

Average Spend
$59.76

Satisfaction Rate
41.9%

Key Business Risk

43% of customers have never purchased without a discount, and this trend is consistent across all customer segments (41–45%). This indicates that promotions are influencing purchases even among customers who may be willing to buy at full price.

With nearly **43% of transaction volume tied to discounts**, revenue remains vulnerable to promotional reductions. In comparison, loyal customers spend **$5.33 more per order** and show **15% stronger full-price purchasing behavior.**

Key Business Strength

The brand has a solid foundation of **1,660 loyal customers (42.6%)** who consistently purchase at full price and demonstrate strong repeat-buying behavior.

These customers are typically **36–57 years old**, subscribed to brand communications, and average **34 prior purchases**.

Growth Opportunities

Arizona and Kansas represent attractive growth markets, combining high average spend (**$55–$67**) with relatively low promo dependency (**24–34%**), indicating potential for profitable expansion.

Strategic Roadmap

Immediate	Launch a Brand Insiders loyalty program for loyal customers and establish a retention-focused baseline.
90 Days	Replace percentage-based discounts with Brand Credits for high-value promo-driven customers.
6 Months	Concentrate promotional efforts on Outerwear and encourage full-price Clothing purchases through targeted cross-selling.
